# Teaching of Science in Portugal

- The teaching of science takes place from 1st to 3rd cycle
- In secondary education depends on the option that the student chose

# Teaching of Science in Portugal

- at first cycle, we don't have a specific subject for science education.
- the second cycle, students have the subject called "Natural sciences".
- the third cycle, students have Physics, Chemistry and Natural Science.
- secondary school students can choose "biology and geology", and "physics and chemistry".
- In the last year students can choose two subjects from Biology, Physics or Chemistry.
